The New York weekly bank statement shows the following changes:

Circulation, decrease..... 102,600 The banks now hold \$80,831,000 in excess of the requirements of the 25 per cent. rule. Total sales of stocks Saturday amounted to 118,800 shares. Sugar was the leader and was the subject of many rumors. It was stated that the American Sugar Refining Company had decided to publish its annual report for 1893 on Monday, which would show profits sufficient to warrant the payment of an extra dividend of 8 per cent. It was said that a 5 per cent. extra dividend would certainly be declared, if not the full 8 per cent. It was claimed also that the sugar interests had secured pledges of a majority of the Senate that refiners would receive protection to the

extent of 14 per cent., and that the necessity for withholding the annual report existed no longer. These points were all given out before the opening of business, consequently the Sugar crowd was the center of attraction when the business of the day was begun. Brokers believed to represent an operator who has manipulated most of the deals on Sugar were in the ring and took everything offered until the price touched 98. Some of the traders attempted to realize profits and sent the quotations down to 96%, but renewed buying caused a rally to 97%, which was followed by a reaction to 96, with a final recovery to 97, leaving a gain on the day of 1½. The eaving a gain on the day of transactions in all the rest of the list did not equal the dealings in Sugar, the only other shares displaying even moderate activity being Chicago Gas and St. Paul. which fluctuated within limits of % per cent. The general market moved sluggishly, and without concerted action, being fairly firm during the first hour, then weakening and closing firm, but irregularly, compared with the last sales of Friday. The losses were fractional, except for a decline of 11/2 on Iowa Central preferred. The gains did not exceed 1/2 per cent ex-

and New York, New Haven & Hartford, which sold at 193, against 187 the last previous sale. The principal changes for the week are: Declines-Missouri Pacific, 11/2; General Electric, 13/4; Burlington and St. Paul, each, 1; Distilling, %; Northwest and Rock Island, each, %; Western Union, %, and Chicago Gas, 1/2 per cent. Advances-Amerlean Tobacco, 61/4; American Tobacco, preferred, 214; Sugar, 5; Sugar, preferred, 2; Cleveland & Pittsburg, 2. The bond market, Saturday, was fairly active and generally firm. The only issues which declined more than a fraction are: Northern Pacific consol fives, 1 per cent.;

cept for St. Paul, Minneapolis & Manitoba,

C., C., C. & St. L., White Water Valley division fours, sold at 90, against 86 on March The changes on the week are mainly in the direction of higher prices, the principal advances being: Chicago, St. Louis & Paducah firsts, 44; C., C., C. & St. L., White Water Valleys, 4; St. Louis & San Francisco seconds, class A and class B, each, 3 per cent. Declines-Brooklyn Elevated seconds, 231/2; San Francisco & Northern Pacific firsts, 71/2, and Cleveland & Canton firsts, 3 per cent. The following table, prepared by James E. U. S. Fours, coup.... 1141/4 WEEKLY FINANCIAL REVIEW. Henry Clews, in his special review of operations on the New York Stock Excharge last week, says.

S. Fours, reg..... 114

During the past week Wall street has lapsed into a state of comparative dullness. In the absence of any important outside support and with a lull in transactions with London, the pools have temporarily retired from active participation in the market, and seem to be waiting for something to turn up calculated to excite new interest. The causes of this lull in speculative operations lie plainly on the surface. The most obvious one is that the gross earnings of the railroads continue somewhat below those of a year ago; besides, comparisons will soon have to be made with last year's gains from the world's fair traffic. Another cause of the quiet on the exchange lies in the uncertainty as to crop prospects. It is true, the bureau's April report of the condition of wheat and rye is very favorable, showing a material percentage of improvement over the estimates of a year ago; but the great storm of this week, covering nearly the whole wheat area, has affected prospects to an extent which cannot yet be estimated; and, until that factor is more def-

initely measured, there will be an element

of suspense in business affairs. Perhaps the most influential cause of the prevailing duliness comes from the condition of legislation in Congress. The tariff bill, from having been apparently certain of enactment, is now thrown into much doubt. It is uncertain whether the Senate will accept the income tax appendage to the tariff, and it is equally doubtful whether the House would consent to the elimination of that feature. There seems to be little chance of the Senate reaching a vote on the question before the middle of May; and after that there is likely to come a dilatory dickering between the two houses. Moreover, it is now becoming a question among Congressmen whether even the President might accept the bill, provided it came to him with the income tax clause annexed. It thus seems possible that this measure may remain unsettled until the beginning or middle of June, and there is no judging whether in the end the bill will be defeated or enacted. This uncertainty brings new confusion into the importing interest and the whole range of home industries, There is no longer any sufficient basis of probability to warrant the undertaking of extensive operations for the fall trade, and the business in manufactured goods must be continued upon the hand-to-mouth scale from which trade has been suffering more on less for the last nine months. It remains to be seen how far public opinion will tolerate this trifling delay. It is but a game of politics, and largely a personal one at that. The peo-

SUGAR IS IN DEMAND | send up a protest to the Senate that will bring the men who are jauntily amusing themselves with a game of party policy to a prompt conclusion. In the meantime, large financial resources centering in Wall street are kept in suspense; plans for new enterprises have to be pigeon-holed until these legislative triflers are through with their exhibition of factional fencing; and manufacturers and merchants are kept on the gridiron of doubt waiting for they know

wall street, however, accepts this situation with mortification rather than apprehension. It is to the men of finance a loss of time and a postponement of opportunities rather than a really threatening disaster. It does not affect their confidence in the general condition of the country nor in its ability to throw off the depression so soon as these legislative restrictions are removed, nor their assurance of a national revival of enterprise so soon as business is released from the grip of a set of legisla-tive experimenters. The end of these obstructions is in sight; and, with the abundance of loanable capital now seeking employment, operators will prefer to hold on to their securities and their plans, rather than surrender either at loss. In the meantime, it is not the best policy of the men of Wall street to keep silence while thus waiting. They have a voice that can make

itself respected when rightly used.
The bank note caucus of Tuesday last has scarcely caused a ripple in financial circies. In declaring for an unconditional re-peal of the 10 per cent. tax on State bank circulation, it went beyond what even the present wayward Congress is likely to grant. An opportunity for the factions therein represented accepting repeal coupled with conditions of control that would amply guarantee the notes of those banks will be presented to them. If that should be accepted an important gain in the reconstruction of our currency system might be accomplished; if those conditions are rejected the currency situation is likely to remain in its present inflexible state. The probability, however, is that no such improve-ment will be found possible until the elections have assigned to Populism and sectionalism their proper place in national leg-

There is some tendency toward a renewal of the exports of gold. The state of international balances, however, is not likely to admit of any important movement of that character, and, should the outflow prove larger than anticipated, it could have no adverse effect upon our present over-glut-ted money market, while by making money cheaper abroad it would tend to create a London demand for our securities.

LOCAL GRAIN AND PRODUCE.

The Trade of the Week Disappointing-Changes in Values Slight. Like the first week of April, the second week's trade was disappointing in its volume. Some genuine spring weather would greatly help matters without doubt. In prices changes were few and slight. Eggs are 1 cent higher than a week ago, poultry 1/2c higher, and everything in the fruit line is higher. Irish potatoes are 5c higher than a week ago. Oranges, lemons, strawberries and new tomatoes all continue in light supply and prices firm. The light receipts of strawberries are rather surprising. Usually they are plenty by the middle of April and selling at one-half the present figures. New tomatoes are in the luxury list as regards prices, and the stock arriving is inferior in quality. Staple groceries carry a strong tone. There were some changes in canned goods and dried fruits, but of little importance. Sugars and coffee are firm and steady. Some descriptions of hog products are higher than a week ago, with an active jobbing demand. The seed men had a busy week. The local grain market presented more activity last week than for several weeks past. The demand for wheat was limited, but for corn and oats there was an active request, and all receipts were readily taken at the range of quotations of some

Could Face It.

Musical Courier. Mme. M., a very clever pianist, when sitting next to Colonel Ramollot at the dinner table, asked him in a winning tone of voice: Are you fond of music, Colonel?" "Madame," replied the warrior, rolling a savage pair of eyes, "I am not afraid of it."

A bunion may be cared by bathing the affected part in hot water to which a teaspoonful of salt, a tablespoonful of starch and a few drops of arnica have been added, then wipe dry with a soft linen towel and apply fodine with a camel's hair brush. Wear a loose shoe all the time, or one which has the leather covering the bunion cut out. Bunions are caused by undue pressure. A good plan, if you have to be out a good deal, is to have the shoemaker cut a piece from your shoe where it presses upon the bunion and replace it with an

FELL WHEAT

Prices Broke on Reports of Needed Rain in Kansas.

Steady Decline in the Leading Cereal with Corn Unchanged and Provisions Slightly Higher.

CHICAGO, April 14.-Rain in Kansas broke both the drought and the wheat market. Compared with yesterday's closing prices, the latter is 1%c lower. The large export trade in wheat yesterday reported from New York simmered down to about thirty boatloads. Nothing in the way of export business was done in wheat there to-day, and the market declined steadily all day, but with a few reactions. Corn closed unchanged, but provisions finished higher all around. The drought in the wheat pit, which

caused the bears to swallow such copious draughts of short wheat yesterday, was broken. Kansas got general rains, apparentily covering the entire State, but the whole area of the Missouri valley reported a generous downpour. That, without anything else, was sufficient to obliterate the bullish feeling which was so conspicuous of the many thing else, was sufficient to obliterate the bullish feeling which was so conspicuous of the many thing else, was sufficient to obliterate the bullish feeling which was so conspicuous of the many thing else, was sufficient to obliterate the bullish feeling which was so conspicuous of the many thanks. The European drought canard also received its quietus. It was raining to England and there was a low bullish feeling which was so conspicuous raining in England, and there was a low barometer over the continent, indicating a probability of general rain there. That left to the bulls only the California drought to hang their hopes on, and that was not enough to prevent a 1c break at the opening. May wheat, which closed yesterday at 61%c, opened to-day with sellers at from 60%c down to 60%c, and no buyers at over 601/2c. In a half hour from the opening it had declined to 59%c, and it did not show traveling through that State for six weeks, sent the following telegram from there to a friend this morning: "The drought here is very serious and in northern California cattle are being given away." some effect in staying the early decline. The price reacted from 59%c to 60%c. The trade in the pit, compared with the previous day's business, was light, and the overworked brokers had time to take a much needed rest. The closing price for May was 6014 66014 c.
The corn market was dull, but prices

were firm and were scarcely influenced by the weakness of wheat. The Liverpool market was quoted weak, with buyers holding off, and there was said to be no Eastern demand, but holders here refused to give way, and there were no selling or-ders of sufficient amount. The drought in California has already produced the effect of creating an inquiry for corn in Na-braska to be shipped to the Pacific coast. May corn opened here at 38%c. Receipts

to-day were 158 cars. There was only a small business transacted in oats. The easier feeling was in sympathy with wheat, as there was not enough doing to create any sign of an independent feeling. May started 1/3c lower, at 32%c, sold off to 32c, up to 32½c and 32%c bid, where it closed. The provision market was strong, with sellers rather scarce, and for the most part confined to those who had a profit in previous purchases. The receipts of hogs were only 10,000, as compared with 14,000 expected. The week's receipts were 141,554, compared with 100,-068 for the similar time a year ago. Packing to date this season amounts to 565,000 head, compared with 254,450 for the corresponding period last year. May pork started with a gain of 10c, improved 121/2c more, but worked off again so that only 5c profit remained over yesterday's closing rate. July, however, rose 25c, and rested with 15c net gain. May lard was hard to buy, and closed at the top price of the day, .1214c higher than yesterday. Ribs closed .0714c higher. Estimated receipts for Monday are: Wheat, 48 cars; corn, 200 cars; oats, cars; hogs, 26,000. Lake business was dull at 14c for corn, and a load of oats was

taken to Buffalo at 14c. Leading futures ranged as follows: Open- High- Low- Clos-Articles. ing. est. est. Wheat-April .. Wool.

BOSTON, April 14.-The Commercial Bulletin says of the Boston wool market: The sales for the week were 2,073,700 pounds domestic and 346,000 foreign, against 1,086,600 pounds domestic and 205,000 foreign last week, and 1,842,129 pounds domestic and 920,-000 foreign for the same week last year. The total sales to date show a shrinkage from those to even dates last year of 13,800,-000 pounds. The receipts similarly show a decrease of 31,401 bales domestic and 64,333 bales foreign. The market is a purely political one. The majority of the trade believe that wool will not be free, but they do not dare to do business on any such basis. Prices on ordinary fine and medium Territory or any other varieties of wool of which there is plenty are fairly steady, but no higher prices on fine delaines, all wools of one-quarter blood grade and staple fine Territory. The scarce wools, in short, are in sellers' favor. The feature of the week is the changed attitude of the great pulling houses of Swift and Armour. They have wired all buyers that their prices are up 162c on all grades on pulled wool. The sales of medium unwashed combing have reached 262,000 pounds, with one sale of one-quarter blood on as high a scoured basis as 35c.

Dry Goods.

NEW YORK, April 14.-For the dry goods market weather conditions were splendid to-day, but came too late in the week to benefit the general demand. Wire and mail orders were few, and for small assortments. Autumn dress goods and spring and autumn underwear commanded attention. Blankets and flannels have commanded no interest of moment, Light ground percales and satines did fairly well. Printing cloths were quiet and steay at 2 13-16c for 64 squares. Fall River sales for the week were 230,000 pieces, including 148,000 pieces of 64 squares.
